Neutrino Tech Systems

Azure Solution Architect

Description
EXPERIENCE: 10+ Years

JOB TYPE: Full Time

LOCATION: Pune

Work Mode: WFO

Role Summary:

We are looking for an experienced Azure Solution Architect to design and implement secure,

scalable, and reliable cloud solutions on Microsoft Azure. You will collaborate with stakeholders,

development teams, and infrastructure experts to deliver cloud-based solutions that align with

business goals.

Responsibilities
Key Responsibilities:

•Design end-to-end architecture for cloud-native and hybrid solutions on Azure.

•Define architecture standards and best practices for cloud adoption and modernization.

•Lead technical discussions and architectural reviews with customers and stakeholders.

•Develop architecture diagrams, technical documentation, and deployment strategies.

•Ensure security, compliance, scalability, and high availability of cloud systems.

•Work closely with DevOps to implement CI/CD pipelines using Azure DevOps or GitHub

Actions.

•Guide teams on Azure services such as Azure App Services, Functions, Logic Apps, AKS,

Storage, and Networking.

•Assist in cloud cost estimation, optimization, and governance.
