Data Architect

Description

EXPERIENCE : 10+ Yr's

JOB TYPE : Full Time

LOCATION : Pune

Work Mode : WFO

Hiring organization

Neutrino Tech Systems

Employment Type

Full-time

Date posted

March 30, 2026

Role Summary:

We are seeking a highly experienced **Data Architect** with strong expertise in **cloud platforms (GCP, AWS, or Azure)** to design, develop, and implement scalable data architecture solutions. The ideal candidate will play a key role in **RFP response, solutioning, customer engagement, and data migration initiatives**, ensuring optimal data strategies aligned with business objectives.

Responsibilities

- Lead **end-to-end data architecture design** and solutioning across multiple cloud environments (GCP/AWS/Azure).
- Develop **High-Level Design (HLD)** and **Low-Level Design (LLD)** documents for enterprise data solutions.
- Collaborate with sales and pre-sales teams on **RFPs, proposals, and customer presentations**.
- Engage directly with customers to understand business requirements, data challenges, and provide optimal architectural solutions.
- Design and oversee **data migration strategies** from on-premise to cloud or between cloud environments.
- Define and implement **data governance, security, and compliance frameworks**.
- Evaluate emerging data technologies and provide recommendations to enhance scalability and performance.
- Work closely with **engineering, DevOps, and analytics teams** to ensure seamless solution delivery.

Qualifications

1. Strong hands-on experience with one or more cloud platforms: **GCP, AWS, Azure**
2. Expertise in **RFP response, HLD design, customer engagement, and solutioning**
3. Proven experience in **data migration** (on-prem to cloud or multi-cloud)
4. Deep understanding of **data warehousing, data lakes, ETL/ELT, and big data ecosystems**
5. Experience with **data security, governance, and compliance frameworks**
6. Excellent communication and presentation skills for client-facing engagements

Job Benefits

- Certifications in any cloud platform (GCP Professional Data Engineer, AWS Certified Data Analytics, Azure Data Engineer Associate)
- Familiarity with **modern data platforms** such as Databricks, Snowflake, or Synapse
- Experience with **CI/CD pipelines** and **Infrastructure as Code (IaC)**
