## Snowflake Developer

### Description

Job Summary:

We are seeking an experienced Snowflake Developer with strong expertise in writing complex SQL queries,

developing stored procedures, and integrating Snowflake with various systems. The ideal candidate will have

a deep understanding of data warehousing concepts and hands-on experience building and optimising data

pipelines in the Snowflake environment.

### Responsibilities

Key Responsibilities:

- Design, develop, and maintain scalable Snowflake data warehouse solutions.
- Write and optimize complex SQL queries for data extraction, transformation, and reporting.
- Develop and manage Snowflake stored procedures using SQL and JavaScript.
- Implement and manage data integration between Snowflake and external systems (e.g., using ETL tools, APIs, or Snowpipe).
- Create and maintain data models and ensure data quality and consistency across environments.
- Collaborate with data engineers, analysts, and business stakeholders to understand requirements and deliver reliable solutions.
- Monitor performance, diagnose issues, and implement performance tuning best practices.
- Implement access controls and security policies aligned with enterprise standards.

### Qualifications

Required Skills & Qualifications:

- Strong hands-on experience with Snowflake platform and architecture.
- Should know python libraries.

### Hiring organization

Neutrino Tech Systems

### Employment Type

Full-time

### Date posted

August 13, 2025

- Advanced proficiency in SQL, including writing and optimizing complex queries.
- Experience with stored procedures, user-defined functions (UDFs), and task scheduling in Snowflake.
- Familiarity with data integration tools (e.g., Informatica, Talend, Apache Airflow, DBT, Fivetran, or custom Python scripts).
- Experience with data modeling (star/snowflake schemas) and data warehouse design.
- Knowledge of cloud platforms (AWS, Azure, or GCP) and how Snowflake integrates with them.
- Experience working with large datasets and performance tuning of data loads/queries.
- Strong problem-solving and communication skills.
