JDE QA Lead

Description

EXPERIENCE : 5+ Years (QA), 5+ Years relevant in JDE

JOB TYPE : Full time LOCATION : Pune (WFO)

We are seeking a highly skilled and experienced JD Edwards Quality Assurance Leader to oversee and drive

the QA activities for JD Edwards (JDE) implementations, upgrades, and integrations. The QA Leader will

ensure the quality, functionality, and reliability of JDE systems by establishing robust testing frameworks,

leading QA teams, and collaborating with cross-functional teams to deliver high-quality solutions.

Responsibilities

Key Responsibilities:

Quality Assurance Strategy and Planning

Develop and implement QA strategies, plans, and methodologies tailored for JD Edwards implementations

and upgrades. o Define and document quality standards, test plans, and test cases to ensure system

functionality aligns with business requirements. o Establish automated and manual testing frameworks for

functional, integration, regression, and user acceptance testing (UAT).

Team Leadership

Lead and mentor a team of QA analysts and engineers. o Allocate resources, track team performance, and

ensure timely completion of testing phases. o Foster a culture of continuous improvement and innovation

within the QA team.

Test Execution and Monitoring

Manage end-to-end testing efforts for JDE modules, including financials, distribution, manufacturing, and

supply chain. o Oversee defect tracking, analysis, and resolution using appropriate tools. o Ensure

comprehensive test coverage for customizations, configurations, and integrations with third-party systems.

Collaboration and Stakeholder Engagement

Work closely with development, business analysts, and functional teams to clarify requirements and resolve

testing issues. Act as the QA point of contact for project stakeholders, providing regular updates on test

progress and quality metrics. Collaborate with IT and business teams to validate that JDE solutions meet

operational and strategic goals.

Tool and Process Optimization

Evaluate, recommend, and implement test automation tools and QA management platforms. o Drive

continuous improvement initiatives to optimize testing processes, tools, and techniques. o Maintain

compliance with industry standards and best practices in software quality assurance.

Risk Management

Identify, assess, and mitigate risks related to quality and testing timelines. o Ensure that testing aligns with

regulatory requirements and industry standards.

Qualifications

Required Skills & Qualifications:

Bachelor's degree in computer science, Information Technology, or a related field.

Minimum of 10+ years of experience in quality assurance, with a focus on JD Edwards EnterpriseOne or JD

Edwards World.

Proven experience leading QA teams and managing QA activities in large-scale implementations and

upgrades.

Expertise in JDE modules such as Financials, Supply Chain, Manufacturing, and Distribution.

Proficiency with QA tools (e.g., HP ALM, Selenium, JIRA, etc.) and test automation

frameworks.

Strong knowledge of SQL for database testing and understanding of JDE architecture.

Excellent leadership, communication, and organizational skills.

Ability to collaborate effectively with cross-functional teams.

Strong analytical and problem-solving abilities.

Preferred Skills :

Experience with third-party JDE integration testing (e.g., CRM, WMS, EDI).

Knowledge of cloud-based implementations of JD Edwards.

Familiarity with Agile and DevOps practices.
