Airflow for scalable data integration.

• Create and manage data storage using Azure Data Lake Storage Gen2, Blob Storage, and

Microsoft Fabric.

• Develop data quality, cleansing, and matching logic within the MDM framework.

• Integrate MDM solutions with reporting tools such as Power BI and Azure Synapse

Analytics.

• Deploy and orchestrate containerized services using Docker and Azure DevOps.

• Implement and monitor data governance and security using Microsoft Purview, Azure Key

Vault, and Azure Policy.

• Leverage Azure ML, Synapse Spark, and Cognitive Services for data enrichment and

advanced analytics when necessary.

• Maintain observability using Azure Monitor, Log Analytics, and other monitoring tools.

• Collaborate with stakeholders across business, data governance, and IT to ensure MDM aligns with organizational data strategies.

• Ensure compliance with data privacy and regulatory requirements.

Qualifications

Required Skills and Qualifications:

• Bachelor's or Master's degree in Computer Science, Information Systems, or related field.

• 6+ years of experience in data engineering or MDM development roles.

• Strong hands-on experience with:

o Azure Data Factory, Azure Synapse Analytics, Data Lake Storage Gen2, Blob

Storage

o Docker, Azure DevOps, Airflow

o Microsoft Purview, Power BI, Azure ML, Azure Cognitive Services

oAzure Key Vault, Azure Policy, Log Analytics

•Deep understanding of data modeling, data governance, data quality, and metadata

management.

•Familiarity with master data domains (Customer, Product, Vendor, etc.).

•Strong programming/scripting knowledge (e.g., SQL, Python, PySpark).

•Excellent problem-solving, communication, and stakeholder management skills
