PowerBI Developer

Description

work mode-5 Days work from office.

Required Skills

6-8 years of hands-on experience in Power BI report development, DAX, and Power Query.

Expert in SQL – writing complex queries, joins, CTEs, and working with stored procedures.

Strong knowledge of data warehousing concepts, data modeling (star/snowflake), and ETL

pipelines.

Experience in Power BI Service administration, including gateways, data refresh, workspace

management.

Experience working with large datasets and optimizing dashboard performance.

Strong communication skills to interact with senior stakeholders and present data insights

effectively.

Familiarity with cloud platforms (Azure Synapse, Azure Data Lake, AWS Redshift, GCP BigQuery).

Understanding of Agile/Scrum methodology and tools like Jira, Confluence, or Azure DevOps.

Preferred Qualifications

Bachelor's degree in Computer Science, Information Systems, Engineering, or a related field.

Experience integrating Power BI with APIs, SharePoint, Excel, or other third-party tools.

Ability to work independently and manage multiple initiatives in parallel.

Experience with scripting tools like Python or R for analytics (optional but advantageous).
