## PowerBI

### Description

Job Description- Power BI -Financial Dashboard

Additional Responsibilities – Financial Dashboard Focus

- Design, build, and manage financial dashboards that provide insights into revenue, expenses, profitability, cash flow, budgeting, and forecasting.
- Collaborate with finance and accounting teams to define KPIs and metrics such as EBITDA, operating margin, gross profit, ROI, and variance analysis.
- Build models to support month-end close, budget vs. actuals, cost center analysis, and financial planning dashboards.
- Automate data integration from ERP systems (e.g., SAP, Oracle, NetSuite, QuickBooks) and finance data marts into Power BI.
- Ensure data accuracy and audit compliance, with strong version control and change tracking in sensitive financial reporting.
- Apply time-intelligence functions in DAX to create YTD, QTD, MoM, YoY trends, rolling averages, and cumulative financial summaries.
- Build multi-level drilldowns to analyse data across departments, regions, and timeframes for executive-level consumption.
- Implement dynamic filters and slicers for flexible report navigation and enhanced user experience in finance reviews.
- Partner with leadership to visualize scenario analysis and what-if simulations for strategic decision-making.

Preferred Domain Expertise (Finance)

- Understanding of financial statements (P&L, Balance Sheet, Cash Flow).
- Familiarity with CAPEX/OPEX reporting, cost allocation models, and financial compliance regulations (e.g., SOX).
- Experience working with FP&A teams or within corporate finance environments.
- Knowledge of financial data sensitivity and data governance best practices.
