SSRS Developer

Description

We are looking for a skilled SSRS Developer with strong expertise in SQL scripting and reporting along with working knowledge of Snowflake. The ideal candidate should have hands-on experience in designing, developing, and optimizing reports using SQL Server Reporting Services (SSRS) and should be capable of writing efficient SQL queries and stored procedures. Experience with modern cloud data platforms like Snowflake will be an added advantage.

Responsibilities

- Design, develop, and maintain SSRS reports, dashboards, and data visualizations.
- Write complex SQL queries, stored procedures, and scripts to support reporting requirements.
- Extract, transform, and analyze data from Snowflake and SQL Server databases.
- Optimize report performance by improving query performance and data retrieval strategies.
- Collaborate with data engineers, analysts, and business stakeholders to gather reporting requirements.
- Develop parameterized and drill-down reports to support business insights.
- Troubleshoot and resolve reporting and data-related issues.
- Ensure data accuracy, consistency, and performance across reports.
- Support report deployment, scheduling, and subscription in SSRS.
- Participate in data validation and testing for reporting solutions.
